

Sage Evolution

for the Wholesale and Distribution Industry

An integrated and holistic software solution for a multifaceted business environment.

Inventory

Reduce excess inventory, minimise stock-outs and produce orders in no time at all

Multiple Branches

Easily transfer inventory between branches and track quantity and cost per branch and in transit

Delivery Management

Monitor multiple deliveries against an order and raise a single consolidated invoice across multiple deliveries

Scanning

Use bar code scanners to ensure that correct SKUs are picked and delivered and avoid losing sales by delivering incorrect products

Serial Tracking

Use serial numbers to track purchase and sale dates and supplier/customer warranties

Import / Export

Multi-currency support and ability to include all importation costs into inventory valuation ensure accurate costing

Inventory Reservation

Reserve stock for important customer orders and easily allocate stock to orders when goods are received

Forecasting

Ensure forecasts are accurate and up to date as circumstances change. Helps in decision making
